GOOAL!

10

01 The yellow strips on the Bed and Bed-base Headboard are replaced with red and any fan emphasis to a certain team is eliminated.

02 Straight metals are used in place of curved metals and thus the ASS problem is eliminated.

The mattress of our series that was 90x190cm is now being produced also in dimensions of 100x200 cm. In addition, an XL mattress of 120x200 cm is added upon the large demand of our customers.

01

01 We developed a Standard bed in dimensions of 90x190 cm for our price-focused customers. We have thus aimed not to lose customers because of price.

We continued the theme effect by using 3D stickers at the head and foot of the bed.

01 Straight metals are used in place of curved metals and thus the ASS problem is eliminated.

We divided our standard desk into two modules upon your request, and thus allowed our customers the opportunity to make a choice.

Technical Details

- The main material is non-hazardous melamine coated chipboard at E1 standards, resistant to scratching, fading and humidity.
- 25,16,12 and 8 mm thick melamine coated chipboard is used.
- Candied apple and Iceland blue particle board is used in all products.
- Bed and bed-base headboards are fabric coated and are enriched with embroidery patterns from the visual perspective.
- Electronically equipped lighting, Bluetooth feature, USB port and sound system with speakers are used at the desk with units.
- Hinges with retarders are used at the covers to prevent hand entrapment and noise.
- Wall fixation apparatuses are used in high modules to prevent them from falling over.
- Insides of the closet drawers are equipped with compartments.
- Edges are covered by 0.40 and 2 mm edge strips.
- Hanger rods with LED luminaire are used in the closets.
- Dresser top drawers are divided into compartments by separators.
- Tandem partially-angled rails are used at the drawers.
- Drawers have 30 kg load capacity.
- Push-to-open tandem rail is used at the bottom drawers of the dresser and bed-stand.
- The parts used in the series are made of injection ABS raw material and do not pose any hazards for human health.
- Çilek logos and plastic parts are manufactured with the ABS injection technique.
- Fittings that are in compliance with the TÜV-GS and TSE standards are used.
